PROFFESSIONAL SUMMARY

State-level Kabaddi player with 10+ years of experience, having started the sport in 4th Standard. Competed in 200+ matches across school, district, and state-level tournaments, gaining expertise in player performance, match tactics, opposition analysis, and team strategy. Currently pursuing B.E. in Computer Science & Engineering (Artificial Intelligence & Machine Learning) with skills in Java, Python, SQL, and data analysis. Passionate about leveraging AI and sports analytics to deliver data-driven insights that improve individual and team performance, supported by strong analytical, teamwork, communication, and problem-solving skills.

SKILLS

Programming Languages: Java, Python, SQL
Sports Analytics: Player Performance Analysis, Match Analysis, Raid & Defense Analysis, Opposition Analysis, Tactical Analysis, Performance Metrics (KPIs), Video Performance Analysis
Data Analytics & Visualization: Microsoft Excel, Power BI (Learning), Data Analysis, Data Visualization
Artificial Intelligence & Machine Learning: Machine Learning Fundamentals, Data Preprocessing, Predictive Analytics, Sports Data Analytics
Database Management: MySQL, PostgreSQL
Tools & Platforms: Git, GitHub, Jupyter Notebook, VS Code
Core Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP), Statistics, Problem solving,Report generat

ACADEMIC & PROJECT EXPERIENCE

CodeClash – Gamified Competitive Coding Platform
Developed a full-stack competitive coding platform that enables users to practice, compete in 1v1 coding battles, and improve problem-solving skills through real-time challenges and gamified features.

- Built scalable backend using Java, Spring Boot, and REST APIs with layered architecture
- Implemented secure authentication using Spring Security and JWT (role-based access)
- Developed real-time 1v1 coding battles with LeetCode-style problem integration
- Designed leaderboards, contests, and coin-based reward system based on performance
- Used PostgreSQL (Spring Data JPA) and built responsive frontend with HTML, CSS, JavaScript, Tailwind CSS

College Bus Tracking Application
Developed a backend system for real-time college bus tracking with route and stop management.

- Built scalable backend using Spring Boot and REST APIs (layered architecture)
- Implemented real-time bus tracking and route/stop management features
- Integrated OpenStreetMap for live location tracking and map visualization
- Managed relational data using MySQL with efficient database design
- Designed system for reliable, real-time updates for students and admin use

CPI-Based Cricket Performance Analytics Framework Sports Analytics Project

- Applied the Cullinan Performance Index (CPI) framework to evaluate Cricket player and team performance.
- Analyzed player performance using PPI and MPI to calculate the overall CPI.
- Assessed players across six performance pillars: Technical, Tactical, Physical, Mental, Standards, and Impact.
- Performed Gap Analysis and Team Performance Analysis to identify strengths and improvement areas.
- Developed data-driven performance reports using AI, analytics

LEADERSHIP & COMMUNITY

- Active NSS volunteer, contributing to community development and outreach initiatives
- Participated in Scouts, demonstrating leadership, teamwork, and discipline
- Awarded winner in Project Expo for presenting an innovative technical project

RELEVANT COURSEWORK:

- Data Structures & Algorithms – Strong problem-solving and optimization techniques
- Database Management Systems – SQL, query optimization, and relational design
- Object-Oriented Programming (Java) – Applied in building scalable backend systems
